Fall 2016			

University of Hawaii Maui College MATH 206 - Calculus II

1.	Course Alpha.
	MATH
2.	Course Number.
	206
3.	Course Title/Catalog Title.
	Calculus II
4.	Number of Credits.
	4
5.	Contact Hours/Type.
	• Hour lecture (4)
6.	Course Description.
	Extends and completes the calculus on a single real variable with the differentiation and integration of transcendental functions, techniques of integration, applications, and infinite series.
7.	Pre-Requisites.
	MATH 205 with grade C or better, and ENG 100 with grade C or better (or concurrent), or consent.
8.	Co-requisites.
	None.
9.	Recommended Preparation.
	None.
10.	Is this a cross-listed course?
	NO
11.	Reason for Proposal. Why is this course being proposed or modified? This question requires specific information as part of the explanation.
	This course is being modified to update the Student Learning Outcomes and Course Competencies.
12.	Effective Semester and Year.
	Fall 2016
13.	Grading Method. What grading methods may be used for this course?

- Standard (Letter, Cr/NCr, Audit) (0)
- 14. Is this course repeatable for credit? How often can this course be counted toward a degree or certificate?

NO

15. Course Student Learning Outcomes (SLOs).

Competency/ Course SLO	Choose and apply ap propriate formula s or algorithms to comput e limits, derivatives, and integrals of exponential, logarithmic, and other transcendental functions.	Apply integration techniques such as integration by parts, trigonometric substitution, partial fraction decomposition, and those associated with improper integrals, and solve application problems.	Choose and ap ply appropriate formulas, algor ithms, or theor ems to test for convergence of infinite sequen ces and series.	Demonst rate effec tive use of techno logy in solving such pro blems.	Communicate the solution of such problems using standard English, numer ic, graphic, and symbolic representations.
Solve application problems involving integration, such as finding volumes, arc length of plane curves, surfaces of revolution, work done by a force, and an object's center of mass.		€		•	€
Compute limits, derivatives and integrals of transcendental functions, including exponential, logarithmic, inverse trigono metric, and hyperbolic functions.	€	€		€	\(\rightarrow\)

16. Course Competencies.

Competency

Solve application problems involving integration, such as finding volumes, are length of plane curves, surfaces of revolution, work done by a force, and an object's center of mass.

Compute limits, derivatives and integrals of transcendental functions, including exponential, logarithmic, inverse trigonometric, and hyperbolic functions.

Apply the Calculus of transcendental functions to application problems, such as exponential growth and decay, logarithmic differentiation, and Newton's Law of Cooling.

Simplify indeterminate forms using L'Hopital's Rule and other techniques.

Apply various advanced techniques of integration, including substitution, integration by parts, trigonometric integrals and substitution, partial fraction decomposition, numerical integration, and improper integral methods.

Apply calculus techniques to solve first-order linear differential equations, and solve application problems.

Represent a function as an infinite sequence, and compute the limit of that sequence, using limit laws and theorems.

Utilize series notation to represent the sum of an infinite series of numbers, and test various series for convergence using the integral test, the comparison tests, the ratio test, and the root test.

Recognize and apply appropriate convergence formulas or tests for a geometric series, an alternating series, a p-series, a power series, a Taylor series and a Maclaurin series.

17. Recommended Course Content and Timeline. The course content facilitates the course competencies. Course content may be organized by weeks, units, topics or the like.

Weeks 1-4 Review of Integration, Applications of Integration

Weeks 4-8 Calculus of Transcendental Functions and applications

Weeks 9-12 Techniques of Integration and applications

Week 13-16 Infinite Sequences and Series

18. Program Learning Outcomes.

Program SLO

Demonstrate an understanding of theories, practices, histories, and key issues of a field of study using essential terminology and concepts of the discipline.

Use theories, concepts, and practices of a field of study to analyze evidence, artifacts, and/or texts and produce interpretations, hypotheses, evaluations, or conclusions.

Apply theories and/or methods of a field of study to perform practical, scholarly, and/or creative tasks that respond to social, cultural, environmental, or economic issues.

19. College-wide Academic Student Learning Outcomes (CASLOs).

Creativity - Able to express originality through a variety of forms.

Critical Thinking - Apply critical thinking skills to effectively address the challenges and solve problems.

Preparatory Level

Information Retrieval and Technology - Access, evaluate, and utilize information effectively, ethically, and responsibly.

Oral Communication - Practice ethical and responsible oral communications appropriately to a variety of audiences and purposes.

Quantitative Reasoning - Synthesize and articulate information using appropriate mathematical methods to solve problems of quantative reasoning accurately and appropriately.

Preparatory Level

Written Communication - Write effectively to convey ideas that meet the needs of specific audiences and purposes.

20. Linking.

- 21. Method(s) of delivery appropriate for this course.
 - Cable TV (0)
 - Classroom/Lab (0)
 - HITS/Interactive TV (0)
 - Hybrid (0)
 - Online (0)
- 22. Text and Materials, Reference Materials, and Auxiliary Materials.

Thomas' Calculus textbook and access code.

Internet access.

23. Maximum enrollment.

27

24. Particular room type requirement. Is this course restricted to particular room type?

YES

Computer room

25. Special scheduling considerations. Are there special scheduling considerations for this course?

NO

26. Are special or additional resources needed for this course?

Recommended software: Maple or Mathematica

27. Does this course require special fees to be paid for by students?

NO

28. Does this course change the number of required credit hours in a degree or certificate?

No.

29. Course designation(s) for the Liberal Arts A.A. degree and/or for the college's other associate degrees.

Degree	Program	Category	
Associate in Arts:	Liberal Arts	FS - Symbolic Reasoning LE - Elective	

AS:	ANY	QR - Quantitative Reasoning
AAS:	ANY	QR - Quantitative Reasoning
BAS:	ET	QR - Quantitative Reasoning
Developmental/Remedial:		

AA Hawaiian Studies: FS - Symbolic Reasoning

30. Course designation(s) for other colleges in the UH system.

UH Manoa - MATH 241 Calculus II, 4 credits
UH Hilo - MATH 206 Calculus II, 4 credits
UH West Oahu - MATH 241 Calculus II, 4 credits
Leeward CC - MATH 206 Calculus II, 4 credits
Honolulu CC - MATH 206 Calculus II, 4 credits
Kauai CC - MATH 206 Calculus II, 4 credits
Kapiolani CC - MATH 206 Calculus II, 4 credits
Windward CC - MATH 206 Calculus II, 4 credits
Hawaii CC - MATH 206 Calculus II, 4 credits

31. Indicate the year and page # of UHMC catalog referred to. For new or modified courses, please indicate the catalog pages that need to be modified and provide a sheet outlining those changes.

UHMC General Catalog 2015-2016 p. 18, 20, 131, 132

32. College-wide Academic Student Learner Outcomes (CASLOs).

Standard 1 - Written Communication Write effectively to convey ideas that meet the needs of specific audiences and purposes.	
Outcome 1.1 - Use writing to discover and articulate ideas.	
Outcome 1.2 - Identify and analyze the audience and purpose for any intended communication.	0
Outcome 1.3 - Choose language, style, and organization appropriate to particular purposes and audiences.	()
Outcome 1.4 - Gather information and document sources appropriately.	0
Outcome 1.5 - Express a main idea as a thesis, hypothesis, or other appropriate statement.	0
Outcome 1.6 - Develop a main idea clearly and concisely with appropriate content.	1
Outcome 1.7 - Demonstrate a mastery of the conventions of writing, including grammar, spelling, and mechanics.	0
Outcome 1.8 - Demonstrate proficiency in revision and editing.	0
Outcome 1.9 - Develop a personal voice in written communication.	0
Standard 2 - Quantitative Reasoning Synthesize and articulate information using appropriate mathematical methods to solve problems of quantative reasoning accurately and appropriately.	
Outcome 2.1 - Apply numeric, graphic, and symbolic skills and other forms of quantitative reasoning accurately and appropriately.	3
Outcome 2.2 - Demonstrate mastery of mathematical concepts, skills, and applications, using technology when appropriate.	3
Outcome 2.3 - Communicate clearly and concisely the methods and results of quantitative problem solving.	3
Outcome 2.4 - Formulate and test hypotheses using numerical experimentation.	1
Outcome 2.5 - Define quantitative issues and problems, gather relevant information, analyze that information, and present results.	3
Outcome 2.6 - Assess the validity of statistical conclusions.	0
Standard 3 - Information Retrieval and Technology. Access, evaluate, and utilize information effectively, ethically, and responsibly.	
Outcome 3.1 - Use print and electronic information technology ethically and responsibly.	1
Outcome 3.2 - Demonstrate knowledge of basic vocabulary, concepts, and operations of information retrieval and technology.	0

Outcome 3.3 - Recognize, identify, and define an information need.		1
Outcome 3.4 - Access and retrieve information through print and electronic media, evaluating the accuracy and authen information.	ticity of that	1
Outcome 3.5 - Create, manage, organize, and communicate information through electronic media.		1
Outcome 3.6 - Recognize changing technologies and make informed choices about their appropriateness and use.		1
Standard 4 - Oral Communication Practice ethical and responsible oral communications appropriately to a variety of audiences and purposes.		
Outcome 4.1 - Identify and analyze the audience and purpose of any intended communication.	-	0
Outcome 4.2 - Gather, evaluate, select, and organize information for the communication.		1
Outcome 4.3 - Use language, techniques, and strategies appropriate to the audience and occasion.		1
Outcome 4.4 - Speak clearly and confidently, using the voice, volume, tone, and articulation appropriate to the audienc occasion.	e and	0
Outcome 4.5 - Summarize, analyze, and evaluate oral communications and ask coherent questions as needed.		1
Outcome 4.6 - Use competent oral expression to initiate and sustain discussions.		0
Standard 5 - Critical Thinking Apply critical thinking skills to effectively address the challenges and solve problems.		
Outcome 5.1 - Identify and state problems, issues, arguments, and questions contained in a body of information.		3
Outcome 5.2 - Identify and analyze assumptions and underlying points of view relating to an issue or problem.		1
Outcome 5.3 - Formulate research questions that require descriptive and explanatory analyses.		2
Outcome 5.4 - Recognize and understand multiple modes of inquiry, including investigative methods based on observa analysis.	ttion and	3
Outcome 5.5 - Evaluate a problem, distinguishing between relevant and irrelevant facts, opinions, assumptions, issues, biases through the use of appropriate evidence.	values, and	2
Outcome 5.6 - Apply problem-solving techniques and skills, including the rules of logic and logical sequence.		3
Outcome 5.7 - Synthesize information from various sources, drawing appropriate conclusions.		2
Outcome 5.8 - Communicate clearly and concisely the methods and results of logical reasoning.		3
Outcome 5.9 - Reflect upon and evaluate their thought processes, value system, and world views in comparison to those	se of others.	1
Standard 6 - Creativity Able to express originality through a variety of forms.		
Outcome 6.1: Generate responses to problems and challenges through intuition and non-linear thinking.		1
Outcome 6.2: Explore diverse approaches to solving a problem or addressing a challenge.		2
Outcome 6.3: Sustain engagement in activities without a preconceived purpose.		C
Outcome 6.4: Apply creative principles to discover and express new ideas.		1
Outcome 6.5: Demonstrate the ability to trust and follow one's instincts in the absence of external direction		1
Outcome 6.6: Build upon or adapt the ideas of others to create novel expressions or new solutions.		C

33. Additional Information
