

Final Report for Terri L. Tharp-van Nood for conference of DH Methods of Education in Florida July 30 - August 3, 2018

Dental Materials is an accreditation required class. I have been tasked with teaching this very complex subject. By attending the conference on DH Methods of Education in Florida, I have gained many useful tools, resources, and material to help me conduct a successful class. This conference was attended by other DH faculty across the nation. The conference is integral to maintaining a high standard of education with regards to DM across the country.

The class included a USB stick with information such as, syllabus, ppts, lesson plans, assignments, outside resources to use, tests, and quizzes. The group that was present has also organized an email group for discussions on the subject and implementations of Dental Materials. . I feel that attending this conference has given me a better understanding of how to conduct this class and how to impart this important information to our students so they can be successful on their National Boards and in their future careers as Dental Hygienists.

I will be sharing all the information and tools that I have learned during this conference with my colleagues here at UHMC. I will do this with a one hour power point presentation with a question and answer session.
